

NEW!

Adjustable Handle Benders

Bending tube has never been so easy.

Designed for the ease of creating 180° bends without the handle interference usually experienced with single-stage benders, this new line of adjustable handle benders is packed full of enhancements. These benders feature an ergonomical handle design as well as tube rollers in the pressure arm of the bender, which both serve to reduce the effort needed to create bends. Available in inch sizes (1/4", 3/8" and 1/2"), these benders conveniently include a vice lug for mounting purposes.

Features:

- Forms accurate bends up to 180°
- Rollers in the pressure arm for reduced bending effort
- Quick action trigger-release handle repositions the two-stage handle for maximum bending efficiency
- Vice mountable
- Ergonomical handle design for ease of use

Capabilities:

- Bends copper, aluminum, steel and stainless steel tube (recommended for medium to light wall tubing)
- Sizes available include 1/4", 3/8" and 1/2"
- Same bend radii as standard medium-duty (2829S) hand benders

Size	Tube O.D.	Radius to Tube Centerline	Min. Wall Without Flattening	Recommended Max. Wall Thickness		Part No.
