

FEATURES:

1. **Tube Sizes:** 1/4" to 6-1/8"
2. **Pipe Sizes:** 1/4" to 6"

Special sizes available, call factory.

Cush-A-Clamp™

Channel mounted clamping systems ideal for multiple line runs, while absorbing shock and vibration, reducing unwanted noise and preventing galvanic corrosion.

The Clamp

features a unique shoulder stud which is securely fashioned to one clamp half. This "Controlled Squeeze™" design eliminates over-tightening and rotation while a nylon insert nut assures a positive lock. Clamps are available in steel (with electrochromati finish), and stainless steel. Fits any standard 1-5/8" wide channel.

The Cushion

Manufactured from a thermoplastic elastomer, it's built tough to withstand the effects of most oils, chemicals and industrial cleaning compounds, in temperatures from -50°F to 275°F. A patented "Living Hinge" allows the cushion to be spread apart for quick, easy installation on sizes from 1/4" through 1-3/4". Interlock edges and channel locator legs ensure that the cushion remains in place.

Installation

One man, one tool time savings. Retrofits can be added without disassembling your present system.
